APRIL 2019

WISH YOU A VERY **HAPPY** AND A **PROFITABLE** NEW **FINANCIAL YEAR !!**

TIME FOR **TAX PLANNING**

WE WISH THAT THE NEW FINANCIAL YEAR BRINGS A LOT OF FINANCIAL SUCCESS TO YOU AND THAT YOUR TAXABLE INCOME GROWS MANYFOLD. HOWEVER, THAT WISH IS WITH A CAVEAT THAT YOU SHALL NOT BE OVER-BURDENED WITH HIGH TAXES.

WITH RISING INCOME, TAX PLANNING INCREASINGLY OCCUPIES AN IMPORTANT PLACE IN OVERALL WEALTH MANAGEMENT. THE START OF ANY NEW YEAR IS PERHAPS THE BEST TIME TO KNOW AND PLAN FOR YOUR YEAR'S INVESTMENTS, SPENDING AND TAXES. IN APRIL AN INVESTOR IS LIKE TO BE MUCH WISER THAN HE OR SHE IS IN MARCH. IN THIS ARTICLE, WE WILL TALK ON VARIOUS ASPECTS RELATED TO TAX PLANNING.

WHAT IS TAX PLANNING?

To put it in simple words, tax planning is a process by which we can legally minimise the amount of taxes to be paid. We do this by using different provisions (eligible contributions/expenses / deductions, etc) provided to us under the law to reduce our net taxable income. Proper tax planning can not only reduce the tax liability to a good extent but can also help in wealth creation & supporting other financial goals or objectives. Tax planning can be used effectively as part of year start investment and financial planning exercise to see the big picture and arrive at the optimal plan.

WHY SHOULD WE PAY OUR DUE TAXES?

Yes, there is a need to ask and answer this question. India today still lacks the tax culture seen in most developed economies and taxes are seen more of a burden - a bad, negative thing. The number of taxpayers is only about

6.25% of the total population. One reason for this is that most of us are still fearful or demotivated due to wrong notions for tax collectors, perhaps a legacy of the past. However, in recent years, there is some change visible in this attitude, both from taxpayers and the government. During the last budget presentation, the government recognised the importance of tax payers and whole-heartedly thanked them. A large tax payer base can act as a catalyst for realising the dream of a developed India by providing the vital resources needed by the government.

There was a time in India, prior to eighties, when the effective tax rates were very high, almost over 95% of your income. Today, the tax rates have liberalised, many tax saving options have opened up and the effective rates are very affordable and just. Thus, there is no reason for anyone to be afraid of or to hide any income from the government.

Coming back to the obvious reasons, paying due taxes, is like a legal obligation for every entity and evasion of tax is a punishable offence. Timely returns filing and tax payment will help us be worry free and also live a peaceful life without fear of any income tax actions. Apart from the legal obligation, paying your taxes can also be seen as an ethical and moral obligation to contribute towards the nation's development and growth. Filing returns and paying taxes also help us in many different ways like taking a loan, starting a business, establishing credentials for travel/visa to foreign countries, etc.

THE RIGHT TIME TO PLAN YOUR TAXES:

Tax planning must not be treated as the last step before preparation of returns but something that should be taken up before the start of every financial year. Early tax planning done at the start of the new financial year can benefit in a lot many ways by:

cont. on page no. 3

- ▶ Adequate time available to study, understand, plan and use tax provisions to the maximum
- ▶ Tax planning is done appropriately by proper estimation of new financial year earnings, expenses and monthly cash-flows. This is important since it is likely that people engaged in service tend to get incentives, promotions, etc. and businessmen may also enter into revised contracts/rates with associates
- ▶ Awareness of financial goals and planning investments accordingly that make adequate use of tax benefits
- ▶ Adequate time to chose the right avenues and the best products available

In an ideal scenario, tax planning should be covered as part of comprehensive financial planning that one should undertake and/or review of the same at the start of every year. Also, it is important that you seek for an expert's advice from the beginning as it not only provides you various options that you can avail but it also helps take care of your compliance from the beginning of the year.

HOW TO PLAN?

While an elaborate article can be written on this topic alone, it would suffice if we have a brief understanding of the whole idea. There might be multiple ways of tax planning and you may choose a method that is more suited to your needs. It is highly recommended that your financial

advisor or any tax expert if required, be consulted to ensure that the plans are optimal as per your needs.

The first method for tax planning is an elaborate one. The process starts with you having a fair assessment of your likely income for the year. Next, you need to arrive at approximate figures for eligible deductions and expenses and contributions to eligible investments you would be making for the year keeping in mind the changes in the IT provisions for the current financial year. When these things are clear, you will know your taxable income and the gaps still available to be exploited under the various eligible tax provisions.

The second method is like a shortcut. The process starts with preparing your last financial year returns, assuming you have been filing IT returns. This will give you a ready template and understanding of what you have been knowingly or unknowingly doing w.r.t. your taxes. Using this template, you would make the required changes in different figures and provisions, to do your tax planning keeping in mind the changes in the IT provisions for the

current financial year.

Exploring the popular tax-saving provisions like sections 80C and 80D should be at the top of your checklist while planning taxes, irrespective of your approach.

Conclusion:

We now are at a consensus on the need to pay your due taxes honestly but reducing the same with proper tax planning. The financial year start presents the best opportunity for you to sit with your financial advisor and discuss the best combination of the tax saving avenues that you ought to be executed for the year ahead. You now also have ample time to plan for adequate life and medical cover for self and entire family and choose the right products/policies. The entire exercise can even be a part of your periodic investment/financial plan review. Let us start the new financial year with the right step forward.

Have a Prosperous New Financial Year Ahead!

NEW FINANCIAL YEAR: CHANGES NOW EFFECTIVE.

The last budget presented by the government was widely welcomed by everyone. There were many key measures taken for the benefit of taxpayers. Now that the new financial year 2019-2020, has dawned upon us, let us look at these changes now effective

1. KEY TAX CHANGES

The important thing here to note is that the tax slabs have not changed and the earlier tax slabs will continue. However, there does exist a few benefits and concessions to the taxpayers.

Tax rebate: The tax rebate available earlier for individuals earning annual income up to ₹3.5 lakh has been now increased. The total income threshold is now ₹5 lakh which means an increase in the tax rebate from ₹2,500 to ₹12,500. However, this rebate is available only to persons having net taxable income up to ₹5 lakhs and for others with higher net income, this benefit will not be applicable.

2. TDS LIMITS

The Tax Deducted at Source (TDS) limits has been changed significantly for the current financial year. The important thing to note is that while the applicable tax does not change on the income, TDS limit extension does benefit small investors as it will reduce the hassles of claiming a refund where the annual income is below exemption limit.

Interest Income: The threshold for deduction of tax at source on interest earned from banks and post office deposits has been increased from ₹10,000 to ₹40,000.

Rental Income: The Rent Limit for deduction of tax has been increased to 2,40,000 from 1,80,000 in the previous year.

3. REAL ESTATE

Some pretty important changes were made related to real estate taxation norms. This will surely benefit a lot of owners and the real estate markets as well.

Notional Rent: From this year, you will not be required to pay income tax on notional rent from your 'second' house lying vacant. Effectively, 'self-occupied' definition is extended to two houses if the other is not let out. Earlier if an individual had more than one house property, he was required to treat anyone as 'self-occupied' and was required to calculate notional rent and pay tax on the other properties accordingly, irrespective of whether the property was on rent or not.

Capital Gains: This year onwards, a taxpayer can claim exemption from capital gains on the sale of house property if the sale proceeds are invested to purchase/construct up to 'two' house properties. This

benefit was available to only one property earlier subject to conditions. This benefit shall only be applicable if (a) the long-term capital gains shall not exceed ₹2 crore and (b) the benefit is claimed only once in the taxpayer's lifetime.

New GST Rates: The GST is an important component for the housing sector and effective this year, the rates have been further rationalised. For on-going under-construction projects, there is now an option either to charge the GST at 12% with an input tax credit (ITC) or at the new rate of 5% without ITC. In the case of affordable housing, these rates will be 8% with ITC or 1% without ITC.

POPULAR TAX SAVING AVENUES

An important element of income tax rules and also tax planning process for investors is the tax saving provisions available to them. For the new financial year FY 2019-2020, let us have a look at the various options and limits available to us, most of which is a continuation of the previous year.

SECTION	DESCRIPTION*	AMT. LIMIT*
24	Home loan interest payment	₹ 2,00,000
80C 80CCC 80CCD	Contributions to # Life Insurance premium, ULIPs # PPF, Employee's share of Provident Fund, NSC, Senior Citizen Savings Scheme, Sukanya Samridhhi Account, etc. # 5 year Bank or Post office deposits # ELSS # Home loan principal repayment # Tuition fees for 2 children # Annuity plan by life insurer for pension	₹ 1,50,000
	Additional contribution to NPS	₹ 50,000
80D	Health Insurance Premium paid towards (a) Self & Family and (b) Parents up to ₹ 25,000 each in both cases. If, senior citizen then ₹ 50,000. Health check-up up to ₹ 5,000 within overall limit. Note: Deduction also available for medical expenditure up to ₹50,000 for Senior Citizen without cover.	₹ 20,000 - ₹ 1,00,000
80TTA	Interest on Savings Account. Only available to Persons below age 60 years. Does not cover interest from Time /Recurring /Fixed Deposits.	₹ 10,000
80TTB	Interest on Savings Account & all kinds of deposits. Only available to Senior Citizen & above.	₹ 50,000

Apart from the above popular tax saving avenues, there are also some important deductions available for rebate /eligible expenditure made which may not be applicable to all but is still widely used.

SECTION	DESCRIPTION*	AMT. LIMIT*
80DD	Expenditure on disabled dependent	₹ 75,000 / ₹ 1,25,000
80DDB	Medical expenditure on self or dependent for specified diseases	₹ 40,000 / 1,00,000
80E	Interest on Education loan	As per provisions
80G	Eligible Donations - 50% or 100% of amount	As per provisions
80GG	Deduction for the rent paid if HRA is not received.	₹ 60,000
80U	Own physical disability	₹ 75,000 / ₹ 1,25,000
87A	Tax Rebate for net income up to ₹ 5,00,000	₹ 12,500

Note: The income tax details are indicative in nature. Please consult your financial advisor /tax expert for more details.

FUND MANAGER INTERVIEWS

Mr. Sujoy Kumar Das
Head - Fixed Income
Invesco MF.

Q. What is going to determine the policy rate trajectory post elections? How do you see the trend moving in short to medium term of say another 1-2 years from here?

Answer: We think that the growth and inflation dynamic justify policy rates to go lower. Headline inflation has been much lower than RBI's expectation. RBI forecast for inflation by end of fiscal 2020 is under 4%. Q4 2018 GDP growth came in weaker at 6.6% with high frequency data showing slow growth ahead. Post the 50bps rate reduction over Feb and April'19, inflation and growth factors are primarily going to determine the policy rate trajectory post elections. We think there could be a short pause post elections as RBI assesses growth outlook especially as pent up investment and capex normalizes post elections.

Over the next 1-2 years from here, we think global factors will start to weigh for Indian policy rates. Since the global financial crisis in 2008, the world has seen a long stretch of benign economic cycle along with increase in global debt and fiscal deficits across developed markets as well as emerging markets. We think there is a reasonable chance of global economic slow-down over a 1-2 year timeframe, which can cause policy rates to go materially lower from here.

Q. How has been the investment flows into debt markets in recent times? Where has been the money primarily moving?

Answer: The Fixed Income market saw risk aversion since middle of last year as the IL&FS default event sent shock-waves through the system. Markets have seemingly overcome that event as credit spreads have started to soften from the peak and also seen positive flows over last few months. Investors have been more selective investing in debt markets with shorter duration funds and Liquid / Money market funds seeing inflows. However, now that there is a rate reduction cycle underway with RBI trying to work out measures to ensure the effective transmission of lower rates into corporate sector we feel informed investors will start to move into long duration of the market.

Q. What important factors should investors consider before investing into debt funds?

Answer: Multiple factors affect investing in debt funds. Some of the key things to consider are (1) Investment horizon - this helps to determine whether Investors should invest in short duration or long duration funds; (2) Risk appetite – this helps to determine how much credit risk / duration risk is appropriate for the investors. Higher risk appetite can guide investing in funds with higher credit and/or duration risk; (3) Liquidity – requirement for liquidity helps determine what fixed income fund an investor selects. Some fixed income funds invest in less liquid securities and may have exit loads.

Q. What has been the recent investment behaviour foreign funds / FIIs in the Indian debt market?

Answer: Foreign Portfolio Investors (FPIs) are usually quite cautious around election time. This is reflected in cumulative outflows of approximately INR 1,000 crores for the first three months of 2019. The cumulative figure however masks a turnaround in sentiment in March which has seen a huge 14,400 crore inflow in debt markets

Q. What has been your investment strategy - both on the duration side and credit side in the current markets?

Answer: Coming into 2019, we thought that the conditions exist for rates to rally on back of cut in policy rate and lower inflation. That however will be somewhat offset by tighter liquidity in the system and higher securities issuance by the central and state governments. As we stand, we think 10 year government bond yields have further to rally as RBI will focus on transmission of the 50 bps rate cut since beginning of 2019 and liquidity in the system improves on back of series of pro-active steps undertaken by RBI.

On the Credit side, we prefer quality names as opposed to chasing higher yielding names. We think that lending to NBFC sector, which froze since middle of 2018, has thawed but there are still some challenges within the sector.

Q. What would be your advice to a purely debt investor for different time horizons of say over 1 year, 3 years and 5 years. In what products should he invest in?

Answer: We think there are good opportunities in the fixed income markets for investors across different time horizons. High yields and high credit spreads across maturities provide good income as well as total return opportunities to fixed income investors because we think that the path of interest rates is lower from here and of credit spreads is tighter from here. The risk return matrix is tilted in favor of longer duration funds for investors with 3-5 year investment horizon. For investors with 1 year horizon, shorter duration high quality corporate bond funds are suited in this environment.

Average AUM up 3.5% QoQ for Jan-Mar 2019

Average assets under management for the 43-player mutual fund industry rose 3.55 percent quarter-on-quarter to ₹24.46 lakh crore in January-March this year, according to data from the Association of Mutual Funds in India (AMFI). In comparison, total AUM for the industry in October-December stood at ₹ 23.62 lakh crore. In FY19, average AUM rose 6.12 percent year-on-year. Though growth has slowed down, fund managers said participation from retail investors is 'strong', given the volatility in the market. Also, continuous flows from systematic investment plans (SIPs) helped the industry to register growth in AUM. Asset managers said joint investor awareness campaigns by AMFI and fund houses have driven growth for the industry. Among the top 10 asset management companies, HDFC Mutual Fund, with a 2.19 percent rise in assets, continued to remain the top fund house with an AUM of ₹ 3.42 lakh crore. Of the 43 fund houses, as many as 33 mutual funds witnessed growth in their asset base in the January-March quarter of 2018-19, while 10 saw a decline in their AUMs.

Mutual funds increase holding in 'attractively valued' oil & gas stocks

Mutual funds have been adding shares of oil and gas companies such as GAIL, HPCL, BPCL and ONGC over the last few months, encouraged by cheap valuations. As per a report by Motilal Oswal Financial Services, equity schemes have increased their oil and gas sector weight for the fourth successive month in February to reach a new high of 7.8 per cent, a rise of 20 basis points from the previous months, and 120 basis points from the same month a year ago. The sector is now at the fifth position in sector allocation of mutual funds, it was at the seventh position 12 months ago. Fund managers and analysts point out that there are a number of stocks in the space which are trading at a 15-year low valuations. Many companies are now trading at historically low valuations on both price-to-earnings (P/E) as well as price-to-book (P/B) basis.

NEWS UPDATE

IMF scales down India's growth projection for current fiscal to 7.3%

The International Monetary Fund (IMF) has moderately scaled down India's economic growth projection to 7.3 per cent for the current financial year from its earlier forecast of 7.4 per cent and suggested that the country should continue to undertake economic reforms, including hire and fire, to create jobs. The IMF's new growth projections are bit optimistic than the Reserve Bank of India's (RBI's) but moderately pessimistic than the World Bank's. In its World Economic Outlook (WEO), a flagship publication brought out during the annual spring meetings of the IMF and World Bank in Washington, the Fund also revised down its prediction for India's economic expansion to 7.5 per cent from 7.7 per cent for the next financial year.

RBI monetary policy: Repo rate lowered by 25 bps to 6% to boost growth

The six-member monetary policy committee (MPC) of the Reserve Bank of India (RBI) voted 4-2 to reduce the policy repo rate by 25 basis points (bps), as was widely expected by economists and bond-market participants who anticipate at least one more cut in the coming policies. Banks, however, remain non-committal about paring down their lending rates. The central bank kept the policy stance unchanged while the repo rate became 6 per cent from 6.25 per cent earlier. The central bank now expects the GDP to grow at 7.2 per cent in 2019-20, lower than its earlier projection of 7.4 per cent. The governor said recent high frequency indicators pointed to manufacturing growth slowing down, while investment demand remained subdued. But there are other mitigating factors that indicated that business sentiment might have improved.

India ranks 76th on WEF's global Energy Transition index

India has moved up two places to rank 76th on a global energy transition index, which has ranked 115 economies on how well they are able to balance

NEWS UPDATE

energy security and access with environmental sustainability and affordability. Sweden remains on the top on this annual list compiled by Geneva-based World Economic Forum (WEF) and is followed by Switzerland and Norway in the top three, as per its latest report released. The WEF said energy systems have globally become less affordable and less environmentally sustainable than they were five years ago, though access to energy has improved with less than 1 billion now living without access to electricity.

India's share in consumer goods consumption expected to double by 2030

India's share in the final consumption of consumer goods is expected to double by 2030 and the favourable demographics will soon take it ahead of China in regional market dynamics, according to a report. However, India is at a comparative disadvantage vis-a-vis China because of factors like less urbanisation, high concentration of urban pockets and lower enrolments in higher education. Demographics favour India over China in the long run, Swiss brokerage Credit Suisse said in a global report, pointing out India's strengths like population growth being ahead of China till 2045, when the quantum of working class population will be higher.

Govt to borrow ₹4.42 trn in H1 FY2019-20

The finance ministry has said the government will borrow ₹4.42 trillion in the first half of fiscal 2019-20. As per the Union Budget, the gross borrowing was pegged at ₹7.1 trillion for 2019-20, higher than ₹5.71 trillion estimated for the ongoing fiscal. Briefing reporters on the borrowing programme for 2019-20, Economic Affairs Secretary Subhash Chandra Garg said gross borrowing will be ₹4.42 trillion during April-September 2019-20.

Merchandise exports to be at \$330 billion in FY19: Suresh Prabu

Total merchandise exports will be about \$330 billion in the current fiscal

NEWS UPDATE

year, Commerce and Industry Minister Suresh Prabhu has said. This will be lower than the \$350-billion target internally set by the commerce department. Exports have consistently been unable to meet the commerce department's annual trade growth forecast. Speaking at a meet with diplomats from the European Union and the Oceania region, Prabhu said India's exports have risen despite global uncertainties in the early part of 2018-19 (FY19). While petrochemicals, jewellery, and apparel remain major export sectors, newer segments such as agri products have been successfully pushed.

India's April-February fiscal deficit at 134% of FY target

The country's fiscal deficit touched 134.2 per cent of the full-year revised budgeted estimate at the end of February 2019, mainly due to tepid growth in revenue collections, official data showed. In absolute terms, the fiscal deficit for April-February 2018-19 was ₹8.51 lakh crore as against the revised estimate (RE) of ₹6.34 trillion for the entire year, according to Controller General of Accounts (CGA) data. However, Economic Affairs Secretary S C Garg told that the government is committed to restrict the fiscal deficit at 3.4 per cent of the Gross Domestic Product (GDP) as envisaged in the Budget.

Food inflation likely to go up to 2% in FY20 : Goldman Sachs

Food inflation in the country is likely to go up to 2 per cent in the financial year 2019-20 from the 0.7 per cent estimated for FY19, according to a Goldman Sachs report. It can be noted that the low food prices have been one of the prime factors which has aided the RBI to be more accommodatory in its rate setting recently. In the report, foreign brokerage Goldman Sachs attributed the low food prices in the last few months to the prices of cereals and vegetables which have been low for some time.
